MBSi
BE CONNECTED

The MBSi Desk System is a custom designed suite of fully integrated apparatus and systems, intelligently packaged to provide total creative control, from plot to performance.

Housed in a robust, bespoke trolley, the Desk System can be configured for use with GrandMA3, MA2 and MQ500 consoles, allowing access to one of the industry's leading system architecture and user interface combinations.

Featuring a trio of high resolution touch screens and built in CRMX transmitter/ receiver, the system provides precision remote operation of almost every aspect of a lighting installation.

Complete with Integrated local power socket and A3 rigging plot printer, the unit has everything required to design, build, programme and execute even the most complex designs.

Flexible and adaptable enough to handle any production type, whether in the studio or on location, the MBSi Desk System is the ultimate, professional control solution.
